

Ideal world

What are the important aspects in this project?

10min

(For instance, things you need to manage, societal impact, scientific impact, open science, publicity, economic gains etc., try to make them as concrete as possible)

Ideal world

What skills/roles are needed to address these aspects?

10min

(Try to group the skills/roles per aspects, many-to-many connection is possible)

Reality

Do people with those skills / roles exist? Do you know where to find them?

10min

(Think about your own situation, e.g. for a certain skill/role identified, does it exist in your institution, do you know how to approach those groups etc., as concrete as possible)

Reality

Can you / How do you successfully include them in the project?

10min

(If you find the skills/roles in your institution, what are the conditions for including them in the research project)
